

ISSUE	DNA contamination of a case sample (95036589, left breast swab, 1c-1) was traced back to a DNA analyst not connected with the case processing.		
PERTINENT POLICY OR CRITERIA	Evidence contamination.		
CORRECTIVE ACTIONS	The DNA profile was entered into CODIS but later removed once it was discovered to be connected to a laboratory DNA analyst. The Crime Laboratory Manager and Forensic Biology Supervisor decided it would be necessary to ask all forensic specialists, crime scene criminalists, and criminalists in Trace, Firearms, and Forensic Biology, and homicide sergeants and detectives, would be asked to give a DNA sample for elimination purposes on future cases.
